

Arlington, TX

Fence permit planning sheet

REVIEWED OCTOBER 24, 2026 / CITY JURISDICTION ONLY

The starting point

A new fence requires a building permit through ArlingtonPermits. Confirm applicable registration and submit land/work identification, valuation, authorized application and scaled plans. Resolve district/overlay, frontage, boundary, easement and special-scope conditions. Pay assessed charges, obtain issuance before work and follow assigned inspections before concealment. Repair exemptions and the current flat fee are not certified here.

Before work starts

- ☐ Confirm City of Arlington, Texas authority, legal lot lines, zoning and PD/overlay conditions; a postal address or map is not a survey.
- ☐ Describe an entirely new ordinary yard fence; route repair/replacement questions separately because the adopted threshold conflict remains unresolved.
- ☐ Prepare land/work identification, valuation, authorized application and a scaled layout of existing conditions and new fence/gates.
- ☐ Resolve frontage, grade, easement and visibility conditions; identify pool, retaining, masonry or powered work separately.
- ☐ Confirm registration, use ArlingtonPermits, supply requested documents, resolve review/fees and obtain issuance before work.
- ☐ Follow approved plans and assigned inspections, keep work accessible before concealment and retain the permit and final records.

Not a permit, property survey, engineering plan or legal determination.

Confirm current rules, site conditions and required approvals with the authority.
