Evansville, IN

Fence permit planning sheet

REVIEWED OCTOBER 24, 2026 / CITY JURISDICTION ONLY

The starting point

Classify each proposed run under Evansville's published corner-front, other required-front and residential side/rear yard rules. Confirm legal boundaries, required yards and height measurement before fixing the layout. APC ILP and Building Commission permit duties remain separately unresolved. Use only the route assigned to the actual project and obtain any required approvals before work.

Before work starts

- [ ] Confirm Evansville city limits, zoning, actual lot lines, streets and any historic or floodplain status.
- [ ] Classify runs as corner-front, other required-front or residential side/rear; confirm the required-yard scope.
- [ ] Show proposed height, material, gates, position, easements and distances on a clear preparation sketch.
- [ ] Confirm yard definitions and height measurement; do not turn a corner-lot limit into a visibility formula.
- [ ] Determine APC ILP and Building Commission applicability separately; use only assigned documents, routes and charges.
- [ ] Obtain required issued approvals, resolve special functions and private consents, and arrange utility locating before work.

Not a permit, property survey, engineering plan or legal determination.

Confirm current rules, site conditions and required approvals with the authority.
