FENCE ADVISORS

Mesa, AZ

Fence permit planning sheet

REVIEWED OCTOBER 24, 2026 / CITY JURISDICTION ONLY

The starting point

Mesa's current residential FAQ says fences under 6 feet do not need a construction permit, while height, location and material rules remain. It does not settle exactly 6 feet or authorize every fence assembly. Ask Planning about the actual zoning/site approval scope and Permit Services about uncertain height, material or special functions. For required applications use DIMES, prepare scope-appropriate drawings, address corrections and confirm fees, issuance and inspections. The model IBC seven-foot exemption is not Mesa administrative law.

Before work starts

- [ ] Confirm City of Mesa jurisdiction, zoning and applicable historic or other site conditions with Planning.
- [ ] Describe new, replacement or repair work, material, complete height and any pool, retaining or powered-gate function.
- [ ] Locate legal lot and ROW lines, easements, drainage, access and street-visibility constraints.
- [ ] Keep the FAQ's under-six-foot answer separate from zoning; ask Permit Services about endpoints or uncertain assemblies.
- [ ] For required work, prepare scope-appropriate drawings and use the correct DIMES Planning or construction application.
- [ ] Confirm the assessment, required issuance and inspections; retain approval records and maintain the fence.

Not a permit, property survey, engineering plan or legal determination.

Confirm current rules, site conditions and required approvals with the authority.
