FENCE ADVISORS

Stillwater, OK

Fence permit planning sheet

REVIEWED OCTOBER 24, 2026 / CITY JURISDICTION ONLY

The starting point

Prepare each fence run under Stillwater's front, secondary-front and side/rear yard rules. Confirm city limits, easements and sight restrictions with Planning. The FAQ's height trigger is not an all-approval exemption. If Development Services requires a permit, use its current fence application and scope-specific documents; confirm the assessed fee and issued approvals before work.

Before work starts

- [ ] Confirm Stillwater city limits, zoning, legal boundaries, easements and any PUD or other special-site conditions.
- [ ] Label each fence run by front, secondary-front or side/rear yard; show gates, complete height and proposed materials.
- [ ] Have Planning apply the current yard, corner, measurement and sight rules; do not use a generic visibility diagram.
- [ ] Separate pool, retaining, masonry, powered and floodplain functions; obtain their applicable determinations.
- [ ] Confirm any required permit and selected documents with Development Services; do not infer a waiver or fee from a height chart.
- [ ] Obtain required issued approvals, confirm completion steps and private consents, and arrange utility locating before work.

Not a permit, property survey, engineering plan or legal determination.

Confirm current rules, site conditions and required approvals with the authority.
